What you should know about *tinnitus*

Do you or someone you know suffer from constant “ringing in the ears”?

Maybe it’s not ringing exactly. Some people describe it as hissing, buzzing, whistling, roaring and even chirping. Whatever noise it is, the real issue is something called tinnitus.

Tinnitus (“TIN-a-tus” or “Tin-EYE-tus”) is the medical term for the sensation of hearing sound in your ears or head when no external sound is present.

The important thing to know is that tinnitus is not a condition or a disease. Instead, it’s a symptom — typically of something bigger, like an ear infection, high blood pressure or, most commonly, hearing loss.

It’s also important to know that everyone’s tinnitus is different, which is why finding relief has been so elusive — until now.

Quick tinnitus facts

- > Tinnitus is the number one disability for military veterans
- > Tinnitus can occur at any age, and may begin suddenly or progress gradually
- > The most common causes of tinnitus are:
 - Noise exposure (e.g., from shooting or machines at work)
 - Aging
 - Head injury
 - Side effects from medication

Audibel tinnitus technology *products*

Forever changing the way people deal with tinnitus

Audibel®, a leader in hearing health technology, has engineered tinnitus technology products designed to forever change the way people deal with ringing in the ears.

These small, comfortable in-ear devices are designed to deliver all-day relief from tinnitus.

*Audibel is
America's
premier
nationwide
network of
hearing care
providers*

When it comes to comfortable, great sounding and personalized solutions for their hearing needs, people everywhere ask for Audibel — an American owned and operated manufacturer of advanced hearing solutions.

How it works

Using Audibel's patent-pending Multiflex Tinnitus Technology, Audibel tinnitus products create a customizable and comforting sound stimulus that you and your hearing professional can fine-tune to soothe the unique, irritating sounds you hear and take your focus off of it.

Customizable to your unique tinnitus

Audibel tinnitus technology products deliver personalized relief for each individual.

Tinnitus affects every person differently. This includes how it sounds, how annoying it is, or how debilitating it can be.

Audibel tinnitus products tackle the subjective nature of tinnitus head on. No other technology enables such unprecedented personalization to counterbalance your unique tinnitus.

Control is key

Audibel tinnitus technology products use the precise measurements from your audiogram to create a relief stimulus customized specifically to you. From there, you and your hearing professional can fine-tune relief in two unique but important ways:

- 1. Your hearing professional can adjust sound frequency and modulation to better match your unique tinnitus.**
- 2. Audibel's proprietary SoundPoint tool lets you easily pinpoint your preferred sound settings, so your hearing professional can program them at the final fitting stage.**

The result is personalized relief designed just for you!

Delivering the one thing every person with tinnitus wants: *relief*

You want

*Relief for ringing
in the ears*

*Customizable
tinnitus relief*

*Quick and
easy control*

Consult your hearing care professional to find out what tinnitus option is right for you.

A photograph of a woman with short, wavy grey hair and glasses, wearing a white button-down shirt, carrying a young boy on her back. They are on a sandy beach with waves in the background. The woman is smiling and looking to the left. The boy is also smiling and looking towards the camera. The background shows a beach with waves and some rocks.

Hearing technology plays a critical role in the overall satisfaction with your tinnitus product. That's why we strive to provide a comfortable listening experience in many types of environments.

At Audibel,
we believe that to
be fit to hear is to
be fit for life.
